Dear Dr. Shicheng Guo,

Greetings for the day!

Thank you for your kind acceptance. We are glad to have you in our editorial team. We shall soon update your details in our website and notify you with further developments of the journal.

This would be a great start for the Journal to proceed towards its success. We will use your Editorial services for our future endeavors. We welcome your suggestions in improving the Journal standards.

I wish you have a productive time ahead!

Best regards,

Brajen Dungdung

Subject: Re:Austin Journal of Lung Cancer Research: EB Invitation

Dear Dr. Brajen Dungdung,

It's my great honor to receive the invitation. I'd like to be membership of Editorial Board for Austin Journal of Lung Cancer Research. Enclosed is my CV and research interesting. Thank you so much.

Best regards,

Shicheng

Research Interesting:

My research interests and activities over the past five years have mainly centered around the following three areas: 1) DNA methylation based association study and biomarker identification leverage high dimensional dataset, 2) Genome-wide DNA methylation profile (methylome) drafting for the genome of human normal cells or lung cancer with NGS technique in population or single cell mode, 3), Population based association study between genetic variants (SNP, CNV) and complex disease. I am deeply interested in all kinds of question about DNA methylation, such as DNA methylome difference between different species, tissues and different disease status, DNA methylation based biomarkers, novel DNA methylation detection methods, the evolution of DNA methylation modification system. On the other side, I want to do some works on mGwas (methylation based genome-wide association study), meQTL(methylation based quantitative trait loci), Interaction contribution to gene expression between DNA methylation and genetic variants (SNP, CNV), DNA methylation heritability in the populations and specific disease,

Dear Dr. Shicheng Guo,

Greetings for the day!

With references to your eminent contributions in the field of Lung Cancer Research, I will be honored to have you in our Editorial Board for **Austin Journal of Lung Cancer Research**.

It is a newly initiated peer-reviewed open access journal with an aim to develop a platform for innovative researchers working in the areas of Lung Cancer. Articles related to the most recent advancement in the field would be very supportive for the researchers, scholars and academicians.

Austin Publishing Group aims to develop into an enlightening interactive network for researchers all over the world through its scientific publications and meetings.

We would be grateful if you can confirm your participation by sending us your CV and research interests at your earliest convenience.

You can reply me for any further information. I do look forward to hearing from you.

Best regards

Brajen Dungdung
