Dear Dr. Guo,

As you will recall you were recently asked to review the following manuscript:

Manuscript Number: TUBI-D-15-02431

Title: Green tea polyphenol EGCG suppresses osteosarcoma cell growth through upregulating miR-1

As I am ready to make a decision now, your review is no longer required.

Still, I wish to thank you for your kind participation and hope I may call up on your expertise some other time. Thank you very much.

Sincerely yours,

James A. Radosevich, Ph.D.
Associate Editor
