CLEP-D-15-00158R2

Genome-wide analysis of DNA methylation and gene expression defines molecular characteristics of Crohn's disease-associated fibrosis  
Clinical Epigenetics

Dear Dr. Guo,

We have made a decision on CLEP-D-15-00158R2, which you recently reviewed for us.

The decision is: Accept.

You can also view the reviewers' comments at:

<http://clep.edmgr.com/>

Your username is: shicheng.guo@hotmail.com

Your password is: available at this link [http://clep.edmgr.com/Default.aspx?](http://clep.edmgr.com/Default.aspx?pg=accountFinder.aspx&firstname=Shicheng&lastname=Guo&email_address=shicheng.guo@)

[pg=accountFinder.aspx&firstname=Shicheng&lastname=Guo&email\\_address=shicheng.guo@](http://clep.edmgr.com/Default.aspx?pg=accountFinder.aspx&firstname=Shicheng&lastname=Guo&email_address=shicheng.guo@)

Thank you again for your contribution to Clinical Epigenetics.

Best wishes,

Ahihiro Umezawa

Associate Editor: I have carefully read the point-by-point response to the reviewer and the revised manuscript. The authors have already responded to the reviewer's comments enough. So, I concluded that the manuscript reached to the level of acceptance.
