Ms. Ref. No.: CAN-D-15-01219

Title: Distribution and risk of all second primary cancers combined after a specific first primary cancer in German and Swedish cancer registries
Cancer Letters

2014 Impact Factor is 5.621

Dear Dr Guo,

I would be grateful if you would review the above-mentioned manuscript that has been submitted for publication in Cancer Letters.

To view the submission please click on the link <http://ees.elsevier.com/can/l.asp?i=157565&l=OCV3A13Q>

If you are willing to review this manuscript, please click on the link below:

<http://ees.elsevier.com/can/l.asp?i=157567&l=URBOICHD>

If you are unable, please click on the link below. We would appreciate receiving suggestions for alternative reviewers:

<http://ees.elsevier.com/can/l.asp?i=157566&l=L1FPZ101>

Alternatively, you may register your response by accessing the Elsevier Editorial System for Cancer Letters as a REVIEWER using the login credentials below:

<http://ees.elsevier.com/can/>

Your username is: SGUO-885

If you need to retrieve password details, please go to: http://ees.elsevier.com/can/automail_query.asp

If you accept this invitation, I would be very grateful if you would return your review by Aug 07, 2015.

You may submit your comments online at the above URL. There you will find spaces for confidential comments to the editor, comments for the author and a report form to be completed. In your comments, please include an assessment of English language presentation including correct grammar and correct use of wording.

As a reviewer you are entitled to complimentary access to Scopus and ScienceDirect for 30 days. Full instructions and details will be provided upon accepting this invitation to review.

In addition to accessing our subscriber content, you can also use our Open Access content. Read more about Open Access here: <http://www.elsevier.com/openaccess>

*Scopus is the world's largest abstract and citation database of research information and quality internet sources.

With kind regards,

Manfred Schwab, PhD
Editor-in-Chief
