Clinical Epigenetics
Research

Dear Dr Guo,

Many thanks for agreeing to review the above manuscript, submitted to Clinical Epigenetics. Please let us know whether there is likely to be any difficulty in meeting the deadline for your report, which is 31 March 2015.

Below you will find instructions for retrieving the manuscript and returning your report via our website.

Please remember that the information in this manuscript is confidential.

If you have any difficulties accessing the files or returning your report, please inform reviewer@biomedcentral.com. If you have any questions about the manuscript, please let us know by replying to this e-mail.

Many thanks for all your help with this manuscript.

With best wishes,

Ulrich Mahlknecht, MD PhD
Editor-in-Chief
Clinical Epigenetics

e-mail: clinicalepigeneticsjournal@biomedcentral.com

RETURNING YOUR REPORT VIA THE WEB

We would be most grateful if you would return your review through our website which ensures full security. To do this please click this link to access the report upload form:

<http://www.clinicalepigeneticsjournal.com/reviewer/5369081816434474>

RETURNING YOUR REPORT BY EMAIL

If you prefer to return your report by email, please note the following guidelines and use the report template at the bottom of this message, which includes some questions for you to answer.

GENERAL ISSUES TO NOTE

Please refer to items under discussion using paragraph references (e.g. Methods, third paragraph), rather than manuscript page numbers, as the pages numbers will not match the final version of the published article.

Please mark minor comments (spelling, typographical errors, grammatical errors, stylistic suggestions etc) as "Minor issues not for publication" so that, once addressed, the author may remove them from the review.

GUIDELINES

Clinical Epigenetics currently considers the following article types: Case study, Hypothesis, Letter to the Editor, Methodology, Research, Review and Short report articles.

Please make your report as constructive and detailed as possible in your comments so that authors have the opportunity to overcome any serious deficiencies that you find and please also divide your comments into the following categories:

- Major Compulsory Revisions (which the author must respond to before a decision on publication can be reached)
- Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
- Discretionary Revisions (which are recommendations for improvement but which the author can choose to ignore)

Once you have done this, there are also some questions for you to answer, including one that asks your advice on publication.

REPORT TEMPLATE

Confidential comments to editors

Please use this only for comments that relate to ethical or policy issues. Do not use it to repeat all or part of the comments in your review for the authors. These comments will not be included in the report passed to the authors.

Reviewer's report

Please number your comments and divide them into:

- Major Compulsory Revisions

The author must respond to these before a decision on publication can be reached. For example, additional necessary experiments or controls, statistical mistakes, errors in interpretation.

- Minor Essential Revisions

The author can be trusted to make these. For example, missing labels on figures, the wrong use of a term, spelling mistakes.

- Discretionary Revisions

These are recommendations for improvement which the author can choose to ignore. For example clarifications, data that would be useful but not essential.

Please note that both the comments entered here and answers to the questions below constitute the report that will be passed on to the authors.

What next?

Given your assessment of the manuscript, what do you advise should be the next step?

- Accept without revision
- Accept after discretionary revisions (which the authors can choose to ignore)
- Accept after minor essential revisions (which the authors can be trusted to make)
- Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions
- Reject as not sufficiently sound
- Reject as not of sufficient priority to merit publishing in this journal

Level of interest

Please indicate how interesting you found the manuscript:

- An exceptional article (of the kind that might be found in a leading, broad interest journal such as Nature, Cell, Science, New England Journal of Medicine, Lancet)
- An article of outstanding merit and interest in its field (of the kind that might be found in the leading specialist journal in the field)
- An article of importance in its field
- An article whose findings are important to those with closely related research interests
- An article of limited interest

Quality of written English

Please indicate the quality of language in the manuscript:

- Not suitable for publication unless extensively edited
- Needs some language corrections before being published
- Acceptable

Quality of Figures

All images and figures within the manuscript should be genuine i.e. without evidence of manipulation. No specific feature within an image may be enhanced, obscured, moved, removed, or introduced. If you have concerns about the veracity of the figures you should choose the first option below.

- Original image files are needed in order to check the figures.
- Acceptable.

Statistical review

Is it essential that this manuscript is seen by an expert statistician? If so, please give your reasons in your report.

- Yes, and I have assessed the statistics in my report.
- Yes, but I do not feel adequately qualified to assess the statistics.
- No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests

Please complete a declaration of competing interests, considering the following questions:

- Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?
- Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?
- Do you hold or are you currently applying for any patents relating to the content of the manuscript? Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?
- Do you have any other financial competing interests?
- Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
